

METHOD AND APPARATUS FOR PROVIDING MEDIA COMMUNICATION SETUP STRATEGY IN A COMMUNICATION NETWORK

ABSTRACT OF THE DISCLOSURE

[0074] The disclosed embodiments provide methods and apparatus for providing group communication setup strategy for media communication to a group of users operating on diverse infrastructures in a wireless communication network. The method provides receiving a request from an originator for media communication, determining types of infrastructures on which the originator and targets are operating on, and providing a group communication setup strategy for the originator based on the determined types of the infrastructures.
